## EB11715 - Goat Anti-CBX7 (aa88-99) Antibody

Size: 100µg specific antibody in 200µl

### Target Protein

**Principal Names:** CBX7, chromobox homolog 7, chromobox protein homolog 7

**Official Symbol:** CBX7

**Accession Number(s):** NP\_783640.1

**Human GeneID(s):** [23492](#)

### Immunogen

Peptide with sequence C-DLRSSHKAKGKE, from the internal region of the protein sequence according to NP\_783640.1.

Please note the [peptide](#) is available for sale.

### Purification and Storage

Purified from goat serum by ammonium sulphate precipitation followed by antigen affinity chromatography using the immunizing peptide.

Supplied at 0.5 mg/ml in Tris saline, 0.02% sodium azide, pH7.3 with 0.5% bovine serum albumin.

Aliquot and store at -20°C. Minimize freezing and thawing.

### Applications Tested

**Peptide ELISA:** antibody detection limit dilution 1:128000.

**Western blot:** Preliminary experiments gave an approx 23kDa band in lysates of cell lines A549, CACO2, MCF7 and MRC5 PD19 after 0.01µg/ml antibody staining. Please note that currently we cannot find an explanation in the literature for the band we observe given the calculated size of 28.3kDa according to NP\_783640.1. The 23kDa band was successfully blocked by incubation with the immunizing peptide. We would appreciate any feedback from people in the field - have any results been reported with other antibodies/lysates? Have any further splice variants/modified forms been reported?

### Species Reactivity

**Tested:**

**Expected from sequence similarity:** Human, Dog, Pig, Cow
