EB12532 - Goat Anti-CD96 Antibody

Size: 100µg specific antibody in 200µl

Target Protein

Principal Names: CD96, CD96 molecule, TACTILE, CD96 antigen, T cell activation, increased late expression, T-cell surface protein tactile, cell surface antigen CD96, t cell-activated increased late expression protein

Official Symbol: CD96

Accession Number(s): NP_937839.1; NP_005807.1

Human GeneID(s): [10225](#)

Important Comments: This antibody is expected to recognize both reported isoforms (NP_937839.1; NP_005807.1).

Immunogen

Peptide with sequence KYTCIQEPNEDS, from the C Terminus of the protein sequence according to NP_937839.1; NP_005807.1.

Please note the [peptide](#) is available for sale.

Purification and Storage

Purified from goat serum by ammonium sulphate precipitation followed by antigen affinity chromatography using the immunizing peptide.

Supplied at 0.5 mg/ml in Tris saline, 0.02% sodium azide, pH7.3 with 0.5% bovine serum albumin.

Aliquot and store at -20°C. Minimize freezing and thawing.

Applications Tested

Peptide ELISA: antibody detection limit dilution 1:128000.

Western blot: Preliminary experiments gave an approx 100+75kDa bands in Jurkat lysates after 0.3µg/ml antibody staining. Please note that currently we cannot find an explanation in the literature for the band we observe given the calculated size of 65.6kDa according to NP_937839.1. The 100kDa and 75kDa bands were successfully blocked by incubation with the immunizing peptide. We would appreciate any feedback from people in the field - have any results been reported with other antibodies/lysates?

Species Reactivity

Tested:

Expected from sequence similarity: Human
