# EB08923 - Goat Anti-COG8 Antibody

Size: 100µg specific antibody in 200µl

## **Target Protein**

Principal Names: COG8, component of oligomeric golgi complex 8, DOR1, FLJ22315,

conserved oligomeric golgi complex component 8, dependent on RIC1

Official Symbol: COG8

Accession Number(s): NP\_115758.3

Human GeneID(s): 84342

#### **Immunogen**

Peptide with sequence C-KAIQETVEKFQEE, from the internal region of the protein sequence according to NP\_115758.3.

Please note the peptide is available for sale.

## **Purification and Storage**

Purified from goat serum by ammonium sulphate precipitation followed by antigen affinity chromatography using the immunizing peptide.

Supplied at 0.5 mg/ml in Tris saline, 0.02% sodium azide, pH7.3 with 0.5% bovine serum albumin

Aliquot and store at -20°C. Minimize freezing and thawing.

#### **Applications Tested**

Peptide ELISA: antibody detection limit dilution 1:16000.

Western blot: Preliminary experiments gave bands at approx. 25kDa and 45kDa in Human Brain (Cerebellum) lysates after 1µg/ml antibody staining. Please note that currently we cannot find an explanation in the literature for the bands we observe given the calculated size of 68.4kDa according to NP\_115758.3. Both detected bands were successfully blocked by incubation with the immunizing peptide (and BLAST results with the immunizing peptide sequence did not identify any other proteins to explain the additional bands).

IHC: Paraffin embedded Human Kidney. Recommended concentration: 5µg/ml.

## **Species Reactivity**

Tested: Human

Expected from sequence similarity: Human

EB08923 (5μg/ml) staining of paraffin embedded Human Kidney. Steamed antigen retrieval with citrate buffer pH 6, AP-staining.
