# EB06855 - Goat Anti-EHD4 Antibody

Size: 100µg specific antibody in 200µl

## **Target Protein**

Principal Names: EHD4, EH-domain containing 4, HGNC:3245, PAST4, EH domain containing 4, ortholog of rat pincher, hepatocellular carcinoma-associated protein HCA11 Official Symbol: EHD4 Accession Number(s): NP\_644670.1 Human GeneID(s): <u>30844</u>

### Immunogen

Peptide with sequence C-SHRKSLPKAD, from the C Terminus of the protein sequence according to NP\_644670.1.

Please note the peptide is available for sale.

## **Purification and Storage**

Purified from goat serum by ammonium sulphate precipitation followed by antigen affinity chromatography using the immunizing peptide.

Supplied at 0.5 mg/ml in Tris saline, 0.02% sodium azide, pH7.3 with 0.5% bovine serum albumin.

Aliquot and store at -20°C. Minimize freezing and thawing.

### **Applications Tested**

Peptide ELISA: antibody detection limit dilution 1:32000.

**Western blot:** Preliminary experiments gave an approx 28-30kDa band in human breast and testes lysates after 0.05µg/ml antibody staining. Please note that currently we cannot find an explanation in the literature for the band we observe given the calculated size of 61.1kDa according to NP\_644670.1. The 28-30kDa band was successfully blocked by incubation with the immunizing peptide. We would appreciate any feedback from people in the field - have any results been reported with other antibodies/lysates? Have any further splice variants/modified forms been reported?

## **Species Reactivity**

Tested:

Expected from sequence similarity: Human, Mouse, Rat
