## EB10143 - Goat Anti-FANCE Antibody

Size: 100µg specific antibody in 200µl

### Target Protein

**Principal Names:** FACE, FAE, Fanconi anemia, complementation group E, FANCE

**Official Symbol:** FANCE

**Accession Number(s):** NP\_068741.1

**Human GeneID(s):** [2178](#)

### Immunogen

Peptide with sequence C-EHKSLES LADGGS, from the internal region of the protein sequence according to NP\_068741.1.

Please note the [peptide](#) is available for sale.

### Purification and Storage

Purified from goat serum by ammonium sulphate precipitation followed by antigen affinity chromatography using the immunizing peptide.

Supplied at 0.5 mg/ml in Tris saline, 0.02% sodium azide, pH7.3 with 0.5% bovine serum albumin.

Aliquot and store at -20°C. Minimize freezing and thawing.

### Applications Tested

**Peptide ELISA:** antibody detection limit dilution 1:32000.

**Western blot:** Preliminary experiments gave an approx 70kDa band in Human Adipose and Uterus lysates after 0.1µg/ml antibody staining. Please note that currently we cannot find an explanation in the literature for the band we observe given the calculated size of 58.7kDa according to NP\_068741.1. The 70kDa band was successfully blocked by incubation with the immunizing peptide. We would appreciate any feedback from people in the field - have any results been reported with other antibodies/lysates? Have any further splice variants/modified forms been reported?

**IHC:** In paraffin embedded Human Placenta shows nuclear staining in some trophoblasts. Recommended concentration, 3-6µg/ml.

### Species Reactivity

**Tested:** Human

**Expected from sequence similarity:** Human, Cow

EB10143 (3.8µg/ml) staining of paraffin embedded Human Placenta. Steamed antigen retrieval with citrate buffer pH 6, AP-staining.
