EB07021 - Goat Anti-Fibrillin 2 Antibody

Size: 100µg specific antibody in 200µl

Target Protein

Principal Names: FBN2, fibrillin 2 (congenital contractural arachnodactyly), HGNC:3604, CCA, fibrillin 2, fibrillin 5

Official Symbol: FBN2

Accession Number(s): NP_001990.2

Human GeneID(s): [2201](#)

Immunogen

Peptide with sequence KELKKLEESNEDDC, from the internal region (near the C Terminus) of the protein sequence according to NP_001990.2.

Please note the [peptide](#) is available for sale.

Purification and Storage

Purified from goat serum by ammonium sulphate precipitation followed by antigen affinity chromatography using the immunizing peptide.

Supplied at 0.5 mg/ml in Tris saline, 0.02% sodium azide, pH7.3 with 0.5% bovine serum albumin.

Aliquot and store at -20°C. Minimize freezing and thawing.

Applications Tested

Peptide ELISA: antibody detection limit dilution 1:32000.

Western blot: Preliminary experiments gave an approx 30-35kDa band in human placenta lysates after 0.3 µg/ml antibody staining. Please note that currently we cannot find an explanation in the literature for the band we observe given the calculated size of 315kDa according to NP_001990.2. The 30-35kDa band was successfully blocked by incubation with the immunizing peptide.

Species Reactivity

Tested:

Expected from sequence similarity: Human, Dog, Cow
