EB06021 - Goat Anti-FOXL1 / FKH6 / FREAC7 Antibody

Size: 100µg specific antibody in 200µl

Target Protein

Principal Names: FOXL1, forkhead box L1, FKH6, FKHL11, FREAC7, forkhead (Drosophila)-like 11, forkhead-like 11

Official Symbol: FOXL1

Accession Number(s): NP_005241.1

Human GeneID(s): [2300](#)

Immunogen

Peptide with sequence C-YFPLQVPDVLHFQ, from the C Terminus of the protein sequence according to NP_005241.1.

Please note the [peptide](#) is available for sale.

Purification and Storage

Purified from goat serum by ammonium sulphate precipitation followed by antigen affinity chromatography using the immunizing peptide.

Supplied at 0.5 mg/ml in Tris saline, 0.02% sodium azide, pH7.3 with 0.5% bovine serum albumin.

Aliquot and store at -20°C. Minimize freezing and thawing.

Applications Tested

Peptide ELISA: antibody detection limit dilution 1:16000.

Western blot: Preliminary experiments gave an approx 90-100kDa band in lysates of Human Heart, Skeletal Muscle, Colon, Duodenum and Pancreas after 1µg/ml antibody staining. Please note that currently we cannot find an explanation in the literature for the band we observe given the calculated size of 36.5kDa according to NP_005241.1. The 90-100kDa band was successfully blocked by incubation with the immunizing peptide. We would appreciate any feedback from people in the field - have any results been reported with other antibodies/lysates? Have any further splice variants/modified forms been reported?

Species Reactivity

Tested:

Expected from sequence similarity: Human
