EB09689 - Goat Anti-GTF3C4 Antibody

Size: 100µg specific antibody in 200µl

Target Protein

Principal Names: GTF3C4, general transcription factor IIIIC, polypeptide 4, 90kDa, FLJ21002, KAT12, MGC138450, TFIII90, TFIIIC90, TFIIICdelta, TFiiiC2-90, OTTHUMP00000022434, general transcription factor IIIIC, polypeptide 4 (90kD)

Official Symbol: GTF3C4

Accession Number(s): NP_036336.2

Human GeneID(s): [9329](#)

Non-Human GeneID(s): 269252 (mouse), 685539 (rat)

Immunogen

Peptide with sequence C-ERLYETSYRLSKNE, from the internal region of the protein sequence according to NP_036336.2.

Please note the [peptide](#) is available for sale.

Purification and Storage

Purified from goat serum by ammonium sulphate precipitation followed by antigen affinity chromatography using the immunizing peptide.

Supplied at 0.5 mg/ml in Tris saline, 0.02% sodium azide, pH7.3 with 0.5% bovine serum albumin.

Aliquot and store at -20°C. Minimize freezing and thawing.

Applications Tested

Peptide ELISA: antibody detection limit dilution 1:8000.

Western blot: Preliminary experiments gave an approx 80kDa band in lysates of cell line K562 after 0.3µg/ml antibody staining. Please note that currently we cannot find an explanation in the literature for the band we observe given the calculated size of 92.0kDa according to NP_036336.2. The 80kDa band was successfully blocked by incubation with the immunizing peptide. We would appreciate any feedback from people in the field - have any results been reported with other antibodies/lysates? Have any further splice variants/modified forms been reported?

Species Reactivity

Tested:

Expected from sequence similarity: Human, Mouse, Rat, Dog, Cow
