EB10044 - Goat Anti-Hoxa4 / Hox-1.4 (mouse) Antibody

Size: 100µg specific antibody in 200µl

Target Protein

Principal Names: AV206827, AV206827, homeo box A4, homeobox A4, HOX1, Hox-1.4, Hox-1.4, MGC130055, OTTMUSP00000020423, Hoxa4

Official Symbol: Hoxa4

Accession Number(s): NP_032291.1

Non-Human GeneID(s): 15401 (mouse)

Immunogen

Peptide with sequence C-DQGPAGPKGKEP, from the internal region of the protein sequence according to NP_032291.1.

Please note the [peptide](#) is available for sale.

Purification and Storage

Purified from goat serum by ammonium sulphate precipitation followed by antigen affinity chromatography using the immunizing peptide.

Supplied at 0.5 mg/ml in Tris saline, 0.02% sodium azide, pH7.3 with 0.5% bovine serum albumin.

Aliquot and store at -20°C. Minimize freezing and thawing.

Applications Tested

Peptide ELISA: antibody detection limit dilution 1:2000.

Western blot: Preliminary experiments gave an approx 26kDa band in Mouse Colon lysates after 1µg/ml antibody staining. Please note that currently we cannot find an explanation in the literature for the band we observe given the calculated size of 30.5kDa according to NP_032291.1. The 26kDa band was successfully blocked by incubation with the immunizing peptide. We would appreciate any feedback from people in the field - have any results been reported with other antibodies/lysates? Have any further splice variants/modified forms been reported?

Species Reactivity

Tested:

Expected from sequence similarity: Mouse
