EB07022 - Goat Anti-IER2 / ETR101 Antibody

Size: 100µg specific antibody in 200µl

Target Protein

Principal Names: IER2, immediate early response 2, HGNC:28871, ETR101, immediate early protein, Pip92, T-lymphocyte activated protein

Official Symbol: IER2

Accession Number(s): NP_004898.2

Human GeneID(s): [9592](#)

Immunogen

Peptide with sequence EVQKEAQRIMTL-C, from the N Terminus of the protein sequence according to NP_004898.2.

Please note the [peptide](#) is available for sale.

Purification and Storage

Purified from goat serum by ammonium sulphate precipitation followed by antigen affinity chromatography using the immunizing peptide.

Supplied at 0.5 mg/ml in Tris saline, 0.02% sodium azide, pH7.3 with 0.5% bovine serum albumin.

Aliquot and store at -20°C. Minimize freezing and thawing.

Applications Tested

Peptide ELISA: antibody detection limit dilution 1:128000.

Western blot: Western Blot: Preliminary experiments gave an approx 60kDa band in Human Brain lysates after 0.1µg/ml antibody staining. Please note that currently we cannot find an explanation in the literature for the band we observe given the calculated size of 24.2kDa according to NP_004898.2. The 60kDa band was successfully blocked by incubation with the immunizing peptide. We would appreciate any feedback from people in the field - have any results been reported with other antibodies/lysates? Have any further splice variants/modified forms been reported?

Immunohistochemistry: Preliminary experiments in paraffin embedded Human Tonsil showed staining in follicles, interfollicular area and endothelial cells. Recommended concentration 0.1-0.3ug/ml

Species Reactivity

Tested:

Expected from sequence similarity: Human, Mouse, Rat, Dog
