EB05492-T - Goat Anti-Kinesin 1 / UKHC Antibody - Trial

Size: 20µg specific antibody in 40µl

Target Protein

Principal Names: KIF5B, UKHC, kinesin 1 (110-120kD), kinesin family member 5B, KNS, KINH, KNS1, U-KHC, kinesin heavy chain

Official Symbol: KIF5B

Accession Number(s): NP_004512.1

Human GeneID(s): [3799](#)

Immunogen

Peptide with sequence C-QPVAVRGGGGKQV, from the C Terminus of the protein sequence according to NP_004512.1.

Please note the [peptide](#) is available for sale.

Purification and Storage

Purified from goat serum by ammonium sulphate precipitation followed by antigen affinity chromatography using the immunizing peptide.

Supplied at 0.5 mg/ml in Tris saline, 0.02% sodium azide, pH7.3 with 0.5% bovine serum albumin.

Aliquot and store at -20°C. Minimize freezing and thawing.

Applications Tested

Peptide ELISA: antibody detection limit dilution 1:8000.

Western blot: Approx 110kDa band observed in lysates of the cell lines Jurkat and HeLa (calculated MW of 110kDa according to NP_004512.1). Recommended concentration: 0.5-1.5µg/ml. Primary incubation was 1 hour. This antibody has been successfully used in WB on Human: Connell et al. (2019) PMID: 31587092.

Additional validation: This antibody has been successfully used in the following paper: Sikorski et al. (2018) PMID: 30377371. **Immunofluorescence:** This antibody has been successfully used in IF on Human: Connell et al. (2019) PMID: 31587092.

Species Reactivity

Tested: Human

Expected from sequence similarity: Human, Mouse, Rat, Dog, Cow
