EB08826 - Goat Anti-LASS5+6 / CerS5+6 Antibody

Size: 100µg specific antibody in 200µl

Target Protein

Principal Names: LASS5, LAG1 homolog, ceramide synthase 5, CerS5, FLJ25304, MGC45411, Trh4, LAG1 longevity assurance homolog 5

Official Symbol: LASS5

Accession Number(s): NP_671723.1; NP_982288.1

Human GeneID(s): [91012](#) , [253782](#)

Non-Human GeneID(s): 71949 (mouse), 366984 (rat)

Important Comments: This antibody is expected to cross-react with the highly similar LASS6.

Immunogen

Peptide with sequence C-RGKVS KDDRSDVES, from the internal region of the protein sequence according to NP_671723.1; NP_982288.1.

Please note the [peptide](#) is available for sale.

Purification and Storage

Purified from goat serum by ammonium sulphate precipitation followed by antigen affinity chromatography using the immunizing peptide.

Supplied at 0.5 mg/ml in Tris saline, 0.02% sodium azide, pH7.3 with 0.5% bovine serum albumin.

Aliquot and store at -20°C. Minimize freezing and thawing.

Applications Tested

Peptide ELISA: antibody detection limit dilution 1:4000.

Western blot: Preliminary experiments gave an approx. 60kDa band in lysates of HEK293, HeLa and HepG2 after 0.5µg/ml antibody staining. Please note that currently we cannot find an explanation in the literature for the band we observe given the calculated size of 45.8kDa according to NP_671723.1. The 60kDa band was successfully blocked by incubation with the immunizing peptide. We would appreciate any feedback from people in the field - have any results been reported with other antibodies/lysates? Have any further splice variants/modified forms been reported?

Species Reactivity

Tested:

Expected from sequence similarity: Human, Mouse, Rat, Dog, Cow
