EB06550 - Goat Anti-LRRK2 / PARK8 (near C Terminus) Antibody

Size: 100µg specific antibody in 200µl

Target Protein

Principal Names: LRRK2, PARK8, Roco2, FLJ45829, DKFZp434H2111, leucine-rich repeat kinase 2, dardarin, Parkinson disease (autosomal dominant) 8

Official Symbol: LRRK2

Accession Number(s): NP_940980.3

Human GeneID(s): [120892](#)

Immunogen

Peptide with sequence CELAEKMRRTSV, from the internal region (near the C Terminus) of the protein sequence according to NP_940980.3.

Please note the [peptide](#) is available for sale.

Purification and Storage

Purified from goat serum by ammonium sulphate precipitation followed by antigen affinity chromatography using the immunizing peptide.

Supplied at 0.5 mg/ml in Tris saline, 0.02% sodium azide, pH7.3 with 0.5% bovine serum albumin.

Aliquot and store at -20°C. Minimize freezing and thawing.

Applications Tested

Peptide ELISA: antibody detection limit dilution 1:128000.

Immunofluorescence: Strong expression of the protein seen in the vesicles of A431 cells and in the vesicles and nuclei of A549 cells. Recommended concentration: 10µg/ml.

Species Reactivity

Tested: Human

Expected from sequence similarity: Human

Specific References

This antibody has been successfully used in the following paper:
