EB08228 - Goat Anti-MAN2A1 Antibody

Size: 100µg specific antibody in 200µl

Target Protein

Principal Names: MAN2A1, mannosidase, alpha, class 2A, member 1, GOLIM7, MANA2, MANII, Golgi alpha-mannosidase II, golgi integral membrane protein 7, mannosidase,

alpha type II, mannosyl-oligosaccharide 1,3-1,6-alpha-mannosidase

Official Symbol: MAN2A1

Accession Number(s): NP_002363.2

Human GeneID(s): 4124

Immunogen

Peptide with sequence C-KISSDIKSQNR, from the internal region of the protein sequence according to NP_002363.2.

Please note the <u>peptide</u> is available for sale.

Purification and Storage

Purified from goat serum by ammonium sulphate precipitation followed by antigen affinity chromatography using the immunizing peptide.

Supplied at 0.5 mg/ml in Tris saline, 0.02% sodium azide, pH7.3 with 0.5% bovine serum albumin.

Aliquot and store at -20°C. Minimize freezing and thawing.

Applications Tested

Peptide ELISA: antibody detection limit dilution 1:16000.

Western blot: Approx. 150kDa band observed in Human Placenta lysates (calculated MW of 131kDa according to NP_002363.2). In transfected HEK293 transiently expressing MAN2A1 a band of approx. 98kDa is observed. This band is not observed in the non-transfected HEK293. Recommended concentration: 1-3μg/ml. An anonymous customer found positive results in WB on Human dermal fibroblasts.

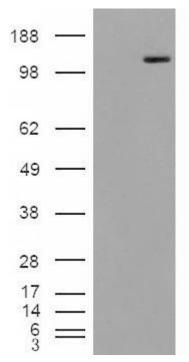

Species Reactivity

Tested: Human

Expected from sequence similarity: Human

EB08228 (0.3μg/ml) staining of Human Placenta lysate (35μg protein in RIPA buffer). Primary incubation was 1 hour. Detected by chemiluminescence.

HEK293 overexpressing Man2A1 (RC220186) and probed with EB08228 (mock transfection in first lane), tested by Origene.
