## EB11554 - Goat Anti-Manic Fringe (mouse) Antibody

Size: 100µg specific antibody in 200µl

### Target Protein

**Principal Names:** AL591946.1, AW546563, beta-1,3-N-acetylglucosaminyltransferase  
manic fringe, manic fringe homolog, Mfng, MFNG O-fucosylpeptide  
3-beta-N-acetylglucosaminyltransferase, O-fucosylpeptide  
3-beta-N-acetylglucosaminyltransferase

**Official Symbol:** Mfng

**Accession Number(s):** NP\_032621.1

**Non-Human GeneID(s):** 17305 (mouse), 315119 (rat)

### Immunogen

Peptide with sequence C-NRPIHASELQSKNR, from the internal region of the protein  
sequence according to NP\_032621.1.

Please note the [peptide](#) is available for sale.

### Purification and Storage

Purified from goat serum by ammonium sulphate precipitation followed by antigen affinity  
chromatography using the immunizing peptide.

Supplied at 0.5 mg/ml in Tris saline, 0.02% sodium azide, pH7.3 with 0.5% bovine serum  
albumin.

Aliquot and store at -20°C. Minimize freezing and thawing.

### Applications Tested

**Peptide ELISA:** antibody detection limit dilution 1:8000.

**Western blot:** Preliminary experiments gave an approx 100kDa band in Mouse Spleen  
lysates after 1µg/ml antibody staining. Please note that currently we cannot find an  
explanation in the literature for the band we observe given the calculated size of 36.2kDa  
according to NP\_032621.1. The 100kDa band was successfully blocked by incubation  
with the immunizing peptide. We would appreciate any feedback from people in the field -  
have any results been reported with other antibodies/lysates? Have any further splice  
variants/modified forms been reported?

### Species Reactivity

**Tested:**

**Expected from sequence similarity:** Mouse, Rat
