# EB05223 - Goat Anti-MARCKS Antibody

Size: 100µg specific antibody in 200µl

### **Target Protein**

**Principal Names:** MARCKS, myristoylated alanine-rich protein kinase C substrate, MACS, 80K-L, PKCSL, MRACKS, PRKCSL, 80K-L, phosphomyristin, myristoylated

alanine-rich protein kinase C substrate (MARCKS, 80K-L)

Official Symbol: MARCKS

Accession Number(s): NP\_002347.4

Human GeneID(s): 4082

#### **Immunogen**

Peptide with sequence ECSPEAPPAEAAE, from the C Terminus of the protein sequence according to NP\_002347.4.

Please note the <u>peptide</u> is available for sale.

## **Purification and Storage**

Purified from goat serum by ammonium sulphate precipitation followed by antigen affinity chromatography using the immunizing peptide.

Supplied at 0.5 mg/ml in Tris saline, 0.02% sodium azide, pH7.3 with 0.5% bovine serum albumin.

Aliquot and store at -20°C. Minimize freezing and thawing.

## **Applications Tested**

**Western blot:** Western blot: Approx 85-95kDa band seen in A431 cell lysates. Recommended for use at 0.5-2µg/ml.

Please note the migration size is consistent with previous experimental results (Biochem J 1990 Sep 15;270(3):583-9). This protein migrates at a much higher than expected size due to myristoylation.

### **Species Reactivity**

Tested: Human

Expected from sequence similarity: Human
