EB12318 - Goat Anti-MED13L (aa361-375) Antibody

Size: 100µg specific antibody in 200µl

Target Protein

Principal Names: MED13L, mediator complex subunit 13-like, PROSIT240, THRAP2, TRAP240L, mediator of RNA polymerase II transcription subunit 13-like, thyroid hormone receptor-associated protein 2, thyroid hormone receptor-associated protein complex 240 kDa component-like

Official Symbol: MED13L

Accession Number(s): NP_056150.1

Human GeneID(s): [23389](#)

Immunogen

Peptide with sequence C-SPKRSGKIPPKLHNNH, from the internal region of the protein sequence according to NP_056150.1.

Please note the [peptide](#) is available for sale.

Purification and Storage

Purified from goat serum by ammonium sulphate precipitation followed by antigen affinity chromatography using the immunizing peptide.

Supplied at 0.5 mg/ml in Tris saline, 0.02% sodium azide, pH7.3 with 0.5% bovine serum albumin.

Aliquot and store at -20°C. Minimize freezing and thawing.

Applications Tested

Peptide ELISA: antibody detection limit dilution 1:128000.

Western blot: Preliminary experiments gave an approx 80kDa band in lysates of cell line HeLa after 1µg/ml antibody staining. Please note that currently we cannot find an explanation in the literature for the band we observe given the calculated size of 243kDa according to NP_056150.1. The 80kDa band was successfully blocked by incubation with the immunizing peptide. We would appreciate any feedback from people in the field - have any results been reported with other antibodies/lysates? Have any further splice variants/modified forms been reported?

Species Reactivity

Tested:

Expected from sequence similarity: Human, Dog, Pig, Cow
