EB05690 - Goat Anti-Microcephalin / BRIT1 Antibody

Size: 100µg specific antibody in 200µl

Target Protein

Principal Names: microcephaly, primary autosomal recessive 1, FLJ12847, BRCT-repeat inhibitor of TERT expression 1, BRIT1, Microcephalin, MCPH1

Official Symbol: MCPH1

Accession Number(s): NP_078872

Human GeneID(s): [79648](#)

Immunogen

Peptide with sequence HKVCAPENYLLSQ, from the C Terminus of the protein sequence according to NP_078872.

Please note the [peptide](#) is available for sale.

Purification and Storage

Purified from goat serum by ammonium sulphate precipitation followed by antigen affinity chromatography using the immunizing peptide.

Supplied at 0.5 mg/ml in Tris saline, 0.02% sodium azide, pH7.3 with 0.5% bovine serum albumin.

Aliquot and store at -20°C. Minimize freezing and thawing.

Applications Tested

Peptide ELISA: antibody detection limit dilution 1:32000.

Western blot: Western Blot: Preliminary experiments gave an approx 40kDa band in Human Kidney lysates at 1ug/ml. This band was successfully blocked by incubation with the immunising peptide. Please note that currently we cannot find an explanation in the literature for the band we observe given the predicted size of approx. 85kDda according to NP_078872. We would appreciate any feedback from people in the field - have any results been reported with other antibodies/lysates? Have any further splice variants/modified forms been reported?

Species Reactivity

Tested:

Expected from sequence similarity: Human
