# EB09089 - Goat Anti-MTNR1B Antibody

Size: 100µg specific antibody in 200µl

### **Target Protein**

Principal Names: MTNR1B, melatonin receptor 1B, MEL-1B-R, MT2, melatonin receptor

MEL1B, melatonin receptor type 1B

Official Symbol: MTNR1B

Accession Number(s): NP\_005950.1

Human GeneID(s): 4544

#### **Immunogen**

Peptide with sequence C-QDASKGSHAEGLQSP, from the C Terminus of the protein sequence according to NP\_005950.1.

Please note the peptide is available for sale.

### **Purification and Storage**

Purified from goat serum by ammonium sulphate precipitation followed by antigen affinity chromatography using the immunizing peptide.

Supplied at 0.5 mg/ml in Tris saline, 0.02% sodium azide, pH7.3 with 0.5% bovine serum albumin

Aliquot and store at -20°C. Minimize freezing and thawing.

#### **Applications Tested**

Peptide ELISA: antibody detection limit dilution 1:32000.

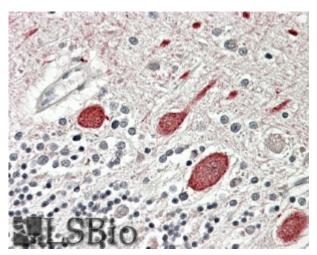

Western blot: Preliminary experiments gave approx .48kDa and 37kDa bands in Human Brain (Cerebellum) lysates after 1μg/ml antibody staining. Please note that currently we cannot find an explanation in the literature for the band we observe given the calculated size of 40.2kDa according to NP\_005950.1. The 48kDa and 37kDa bands were successfully blocked by incubation with the immunizing peptide. We would appreciate any feedback from people in the field - have any results been reported with other antibodies/lysates? Have any further splice variants/modified forms been reported?

IHC: In paraffin embedded Human Cerebellum shows membranous staining primarily in Purkinje cells. Recommended concentration, 3-6μg/ml.

## **Species Reactivity**

Tested: Human

Expected from sequence similarity: Human

EB09089 (3.8 $\mu$ g/ml) staining of paraffin embedded Human Cerebellum. Steamed antigen retrieval with citrate buffer pH 6, AP-staining.
