EB10618 - Goat Anti-Mucin 19 / Apomucin Antibody

Size: 100µg specific antibody in 200µl

Target Protein

Principal Names: Muc19, mucin 19, MUC-19, gel-forming secreted mucin-19, mucin-19, sublingual apomucin, mucin apoprotein

Official Symbol: Muc19

Accession Number(s): NP_997126.2

Non-Human GeneID(s): 239611 (mouse), 497227 (rat)

Immunogen

Peptide with sequence DTFRDCHSKVDPTTY, from the Internal region (near N Terminus) of the protein sequence according to NP_997126.2.

Please note the [peptide](#) is available for sale.

Purification and Storage

Purified from goat serum by ammonium sulphate precipitation followed by antigen affinity chromatography using the immunizing peptide.

Supplied at 0.5 mg/ml in Tris saline, 0.02% sodium azide, pH7.3 with 0.5% bovine serum albumin.

Aliquot and store at -20°C. Minimize freezing and thawing.

Applications Tested

Peptide ELISA: antibody detection limit dilution 1:128000.

Western blot: Not yet tested - our routinely used western blotting protocol does not allow detection of proteins as large as the calculated size of 694kDa according to NP_997126.2. Therefore we cannot recommend an optimal concentration and the antibody is an aspiring product. We would appreciate any feedback from people in the field - have any results been reported with other antibodies/lysates? Have any further splice variants/modified forms been reported?

Species Reactivity

Tested:

Expected from sequence similarity: Mouse, Rat
