EB08607 - Goat Anti-NAT1 Antibody

Size: 100µg specific antibody in 200µl

Target Protein

Principal Names: NAT1, N-acetyltransferase 1 (arylamine N-acetyltransferase), AAC1, NATI, N-acetyltransferase 1, arylamide acetylase 1 (N-acetyltransferase 1), arylamine N-acetyltransferase 1

Official Symbol: NAT1

Accession Number(s): NP_000653.3

Human GeneID(s): [9](#)

Important Comments: This antibody is not expected to cross-react with Human NAT2.

Immunogen

Peptide with sequence C-HSDLLEDSKYRKIY, from the internal region of the protein sequence according to NP_000653.3.

Please note the [peptide](#) is available for sale.

Purification and Storage

Purified from goat serum by ammonium sulphate precipitation followed by antigen affinity chromatography using the immunizing peptide.

Supplied at 0.5 mg/ml in Tris saline, 0.02% sodium azide, pH7.3 with 0.5% bovine serum albumin.

Aliquot and store at -20°C. Minimize freezing and thawing.

Applications Tested

Peptide ELISA: antibody detection limit dilution 1:16000.

Western blot: Preliminary experiments gave an approx. 50kDa band in Human Liver lysates after 1µg/ml antibody staining. Please note that currently we cannot find an explanation in the literature for the band we observe given the calculated size of 33.9kDa according to NP_000653.3. The 50kDa band was successfully blocked by incubation with the immunizing peptide. We would appreciate any feedback from people in the field - have any results been reported with other antibodies/lysates? Have any further splice variants/modified forms been reported?

Species Reactivity

Tested:

Expected from sequence similarity: Human
