# EB11782 - Goat Anti-Nat8l (mouse aa211-223) Antibody

Size: 100µg specific antibody in 200µl

## **Target Protein**

**Principal Names:** 1110038O08Rik, NAA synthetase, N-acetylaspartate synthetase, N-acetyltransferase 8-like, N-acetyltransferase 8-like protein, Nat8l, protein Shati, Shati

Official Symbol: Nat8l

Accession Number(s): NP\_001001985.3

Human GenelD(s): 339983

Non-Human GenelD(s): 269642 (mouse), 289727 (rat)

### **Immunogen**

Peptide with sequence C-SVDSRFRGKGIAK, from the internal region of the protein sequence according to NP\_001001985.3.

Please note the peptide is available for sale.

## **Purification and Storage**

Purified from goat serum by ammonium sulphate precipitation followed by antigen affinity chromatography using the immunizing peptide.

Supplied at 0.5 mg/ml in Tris saline, 0.02% sodium azide, pH7.3 with 0.5% bovine serum albumin.

Aliquot and store at -20°C. Minimize freezing and thawing.

## **Applications Tested**

Peptide ELISA: antibody detection limit dilution 1:16000.

Western blot: Approx 45-48kDa band observed in Human Cerebellum and Mouse Brain lysates, and approx. 48-50kDa in Rat Brain lysates (calculated MW of 32.8kDa according to Human NP\_848652.2 and 32.7kDa according to Mouse NP\_001001985.3 and Rat NP\_001178610.1). These bands were successfully blocked by incubation with the immunising peptide. and correspond to similar findings in literature with different antibodies (Becker et al, PMID: 20643647). Recommended concentration: 0.05-0.1μg/ml. Primary incubation 1 hour at room temperature.

#### **Species Reactivity**

Tested: Human, Mouse, Rat

Expected from sequence similarity: Human, Mouse, Rat, Dog, Cow

EB11782 (0.1μg/ml) staining of Human Cerebellum (A) + peptide (B), Mouse Brain (C) + peptide (D) and (0.05ug/ml) of Rat Brain (E) + peptide (F) lysate (35μg protein in RIPA buffer). Detected by chemiluminescence.
