EB07600 - Goat Anti-Neurochondrin Antibody

Size: 100µg specific antibody in 200µl

Target Protein

Principal Names: NCDN, neurochondrin, KIAA0607

Official Symbol: NCDN

Accession Number(s): NP_055099.1; NP_001014841.1

Human GeneID(s): 23154

Non-Human GenelD(s): 26562 (mouse), 89791 (rat)

Important Comments: This antibody is expected to recognize both reported isoforms (NP_055099.1; NP_001014841.1). Reported variants represent identical protein

(NP_055099.1; NP_001014839.1).

Immunogen

Peptide with sequence C-HYLLQVGSEKQKEP, from the internal region of the protein sequence according to NP_055099.1; NP_001014841.1.

Please note the peptide is available for sale.

Purification and Storage

Purified from goat serum by ammonium sulphate precipitation followed by antigen affinity chromatography using the immunizing peptide.

Supplied at 0.5 mg/ml in Tris saline, 0.02% sodium azide, pH7.3 with 0.5% bovine serum albumin

Aliquot and store at -20°C. Minimize freezing and thawing.

Applications Tested

Peptide ELISA: antibody detection limit dilution 1:16000.

Western blot: Approx 75kDa band observed in lysates of cell lines HepG2 and U251 (calculated MW of 77.2kDa according to NP_001014841.1). An additional band of unknown identity was also observed in U251 lysates at 55kDa. This band was successfully blocked by incubation with the immunizing peptide. Recommended concentration: 0.3-1μg/ml. Primary incubation 1 hour at room temperature. Preliminary testing was unsuccessful on Rat and Mouse Kidney and Brain and NIH3T3 cell line for this particular batch.

Species Reactivity

Tested: Human

Expected from sequence similarity: Human, Mouse, Rat, Dog, Cow

EB07600 (0.3μg/ml) staining of HepG2 (A) and (1ug/ml) U251 cell lysate (B) + peptide (C) (35μg protein in RIPA buffer). Detected by chemiluminescence.
