EB09686-B - Goat Anti-Neurogranin precursor, Biotinylated Antibody

Size: 100µg specific antibody in 200µl

Target Protein

Principal Names: NRGN, neurogranin, RC3, hng, calmodulin-binding protein, neurogranin (protein kinase C substrate, RC3), ng, protein kinase C substrate

Official Symbol: NRGN

Accession Number(s): NP_006167.1

Human GeneID(s): [4900](#)

Important Comments: Reported variants represent identical protein: NP_006167.1, NP_001119653.1

Immunogen

Peptide with sequence CKIKSGERGRKG., from the internal region of the protein sequence according to NP_006167.1.

Please note the [peptide](#) is available for sale.

Purification and Storage

Purified from goat serum by ammonium sulphate precipitation followed by antigen affinity chromatography using the immunizing peptide.

Supplied at 0.5 mg/ml in Tris saline, 0.02% sodium azide, pH7.3 with 0.5% bovine serum albumin.

Aliquot and store at -20°C. Minimize freezing and thawing.

Applications Tested

Peptide ELISA: antibody detection limit dilution 1:128000.

Western blot: Approx 16kDa band observed in Human Brain (Frontal Cortex) lysate (calculated MW of 7.6kDa according to NP_006167.1). The observed molecular weights correspond to earlier findings in literature with different antibodies (Li et al, J Biol Chem. 1999 Jan 15;274(3):1294-300; PMID: 9880498). See non-biotinylated parental product's datasheet for further QC data. Recommended concentration: 0.1-0.3µg/ml.

Species Reactivity

Tested: Human

Expected from sequence similarity: Human, Mouse, Dog, Cow

Biotinylated EB09686 (0.1 μ g/ml) staining of Human Brain (Frontal Cortex) lysate (35 μ g protein in RIPA buffer).
Primary incubation was 1 hour. Detected by chemiluminescence.
