EB09686-B - Goat Anti-Neurogranin precursor, Biotinylated Antibody

Size: 100µg specific antibody in 200µl

Target Protein

Principal Names: NRGN, neurogranin, RC3, hng, calmodulin-binding protein, neurogranin (protein kinase C substrate, RC3), ng, protein kinase C substrate **Official Symbol:** NRGN

Accession Number(s): NP_006167.1

Human GenelD(s): 4900

Important Comments: Reported variants represent identical protein: NP_006167.1, NP_001119653.1

Immunogen

Peptide with sequence CKIKSGERGRKG., from the internal region of the protein sequence according to NP_006167.1.

Please note the peptide is available for sale.

Purification and Storage

Purified from goat serum by ammonium sulphate precipitation followed by antigen affinity chromatography using the immunizing peptide.

Supplied at 0.5 mg/ml in Tris saline, 0.02% sodium azide, pH7.3 with 0.5% bovine serum albumin.

Aliquot and store at -20°C. Minimize freezing and thawing.

Applications Tested

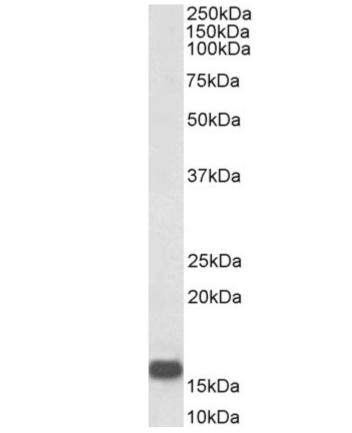

Peptide ELISA: antibody detection limit dilution 1:128000.

Western blot: Approx 16kDa band observed in Human Brain (Frontal Cortex) lysate (calculated MW of 7.6kDa according to NP_006167.1). The observed molecular weights correspond to earlier findings in literature with different antibodies (Li et al, J Biol Chem. 1999 Jan 15;274(3):1294-300; PMID: 9880498). See non-biotinylated parental product's datasheet for further QC data. Recommended concentration: 0.1-0.3µg/ml.

Species Reactivity

Tested: Human Expected from sequence similarity: Human, Mouse, Dog, Cow

Biotinylated EB09686 (0.1µg/ml) staining of Human Brain (Frontal Cortex) lysate (35µg protein in RIPA buffer). Primary incubation was 1 hour. Detected by chemiluminescence.
