EB10786 - Goat Anti-NOTCH4 (aa1261-1273) Antibody

Size: 100µg specific antibody in 200µl

Target Protein

Principal Names: NOTCH4, DAQB-143M3.4, FLJ16302, INT3, MGC74442, NOTCH3,

Notch homolog 4, neurogenic locus notch homolog protein 4

Official Symbol: NOTCH4

Accession Number(s): NP_004548.3

Human GeneID(s): 4855

Non-Human GeneID(s): 18132 (mouse), 406162 (rat)

Important Comments: The immunizong peptide represents part of the extracellular

domain.

Immunogen

Peptide with sequence DHFHNGHCEKGCNN, from the internal region of the protein sequence according to NP_004548.3.

Please note the peptide is available for sale.

Purification and Storage

Purified from goat serum by ammonium sulphate precipitation followed by antigen affinity chromatography using the immunizing peptide.

Supplied at 0.5 mg/ml in Tris saline, 0.02% sodium azide, pH7.3 with 0.5% bovine serum albumin.

Aliquot and store at -20°C. Minimize freezing and thawing.

Applications Tested

Peptide ELISA: antibody detection limit dilution 1:8000.

Western blot: Preliminary experiments gave an approx 27kDa band in all human, mouse and rat tissue and cell line lysates tested after 1µg/ml antibody staining. Please note that currently we cannot find an explanation in the literature for the band we observe given the calculated size of 210kDa according to NP_004548.3. The 27kDa band was successfully blocked by incubation with the immunizing peptide.

Immunofluorescence: Strong expression of the protein seen in the nuclei and membranes of HeLa cells, and in the membranes of NIH3T3 cells. Recommended concentration: 10µg/ml.

Species Reactivity

Tested: Human, Mouse

Expected from sequence similarity: Human, Mouse, Rat, Dog, Pig, Cow

EB10786 Immunofluorescence analysis of paraformaldehyde fixed HeLa cells, permeabilized with 0.15% Triton. Primary incubation 1hr (10ug/ml) followed by Alexa Fluor 488 secondary antibody (2ug/ml), showing membrane and nuclear staining. The nuclear stain is DAPI (blue). Negative control: Unimmunized goat IgG (10ug/ml) followed by Alexa Fluor 488 secondary antibody (2ug/ml).
