# EB07514 - Goat Anti-PCSK9 (aa164-175) Antibody

Size: 100µg specific antibody in 200µl

### **Target Protein**

**Principal Names:** PCSK9, proprotein convertase subtilisin/kexin type 9, FH3, HCHOLA3, NARC-1, NARC1, hypercholesterolemia, autosomal dominant 3, neural apoptosis

regulated convertase 1

Official Symbol: PCSK9

Accession Number(s): NP\_777596.2

Human GeneID(s): 255738

#### **Immunogen**

Peptide with sequence C-PRYRADEYQPPD, from the internal region of the protein sequence according to NP\_777596.2.

Please note the <u>peptide</u> is available for sale.

### **Purification and Storage**

Purified from goat serum by ammonium sulphate precipitation followed by antigen affinity chromatography using the immunizing peptide.

Supplied at 0.5 mg/ml in Tris saline, 0.02% sodium azide, pH7.3 with 0.5% bovine serum albumin.

Aliquot and store at -20°C. Minimize freezing and thawing.

## **Applications Tested**

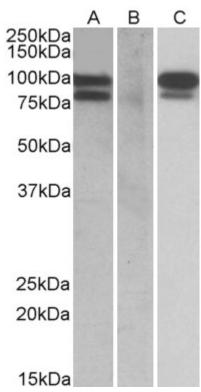

Peptide ELISA: antibody detection limit dilution 1:32000.

**Western blot:** In transfected HEK293 transiently expressing full-length Human PCSK9 (myc and DYKDDDDK tagged), a doublet of approx. 80-100kDa was observed. No bands were observed in mock-transfected HEK293 and the same bands were observed using anti-myc tag antibody. Recommended concentration, 0.1-0.5µg/ml.

### **Species Reactivity**

Tested: Human

Expected from sequence similarity: Human

HEK293 lysate (10ug protein in RIPA buffer) overexpressing Human PCSK9 with C-terminal MYC tag probed with EB07514 (0.5ug/ml) in Lane A and probed with anti-MYC Tag (1/1000) in lane C. Mock-transfected HEK293 probed with EB07514 (1mg/ml) in Lane B. Primary incubations were for 1 hour. Detected by chemiluminescence.
