# EB06373 - Goat Anti-RGS19 / GAIP Antibody

Size: 100µg specific antibody in 200µl

## **Target Protein**

**Principal Names:** RGS19, GAIP, RGSGAIP, regulator of G-protein signalling 19, G alpha interacting protein, guanine nucleotide binding protein alpha inhibiting activity polypeptide

3 interacting protein
Official Symbol: RGS19

Accession Number(s): NP\_005864

Human GeneID(s): 10287

#### **Immunogen**

Peptide with sequence C-LLLQGPSQSSSEA, from the C Terminus of the protein sequence according to NP\_005864.

### **Purification and Storage**

Purified from goat serum by ammonium sulphate precipitation followed by antigen affinity chromatography using the immunizing peptide.

Supplied at 0.5 mg/ml in Tris saline, 0.02% sodium azide, pH7.3 with 0.5% bovine serum albumin.

Aliquot and store at -20°C. Minimize freezing and thawing.

### **Applications Tested**

Peptide ELISA: antibody detection limit dilution 1:32000.

**Western blot:** Western Blot: Preliminary experiments gave an approx 37kDa band in Human Liver lysates at 1ug/ml, this band was successfully blocked by incubation with the immunising peptide.. Please note that currently we cannot find an explanation in the literature for the band we observe given the predicted size of approx. 25kDda according to NP\_005864. We would appreciate any feedback from people in the field - have any results been reported with other antibodies/lysates? Have any further splice variants/modified forms been reported?

## **Species Reactivity**

Tested:

Expected from sequence similarity: Human
