EB05422 - Goat Anti-RGS5 Antibody

Size: 100µg specific antibody in 200µl

Target Protein

Principal Names: RGS5, regulator of G-protein signalling 5, Regulator of G protein signaling-5, RP11-430G6.2, MST092, MST106, MST129, MSTP032, MSTP092, MSTP106, MSTP129

Official Symbol: RGS5

Accession Number(s): NP_003608.1

Human GeneID(s): [8490](#)

Important Comments: This antibody is expected to recognise isoform 1 (NP_003608.1) only.

Immunogen

Peptide with sequence KGLAALPHSCLER, from the N Terminus of the protein sequence according to NP_003608.1.

Please note the [peptide](#) is available for sale.

Purification and Storage

Purified from goat serum by ammonium sulphate precipitation followed by antigen affinity chromatography using the immunizing peptide.

Supplied at 0.5 mg/ml in Tris saline, 0.02% sodium azide, pH7.3 with 0.5% bovine serum albumin.

Aliquot and store at -20°C. Minimize freezing and thawing.

Applications Tested

Peptide ELISA: antibody detection limit dilution 1:32000.

Western blot: Western blot: Approx 40kDa band seen in Human Lung lysate.

Recommended for use at 1-3µg/ml. Please note that we cannot find any reference indicating what size RGS5 runs on SDS PAGE; we also cannot find any obvious reason for it to run at 40kDa. Do you know of anyone who has made an antibody and found it running at the expected weight - it would be very useful for us to know for the purpose of further testing.

Species Reactivity

Tested: Human

Expected from sequence similarity: Human, Mouse, Rat, Dog, Pig, Cow
