EB08301 - Goat Anti-SOX1 Antibody

Size: 100µg specific antibody in 200µl

Target Protein

Principal Names: SRY (sex determining region Y)-box 1, SRY-related HMG-box gene 1

Official Symbol: SOX1

Accession Number(s): NP_005977.2

Human GeneID(s): [6656](#)

Immunogen

Peptide with sequence C-AHPHNPQPMHR, from the internal region of the protein sequence according to NP_005977.2.

Please note the [peptide](#) is available for sale.

Purification and Storage

Purified from goat serum by ammonium sulphate precipitation followed by antigen affinity chromatography using the immunizing peptide.

Supplied at 0.5 mg/ml in Tris saline, 0.02% sodium azide, pH7.3 with 0.5% bovine serum albumin.

Aliquot and store at -20°C. Minimize freezing and thawing.

Applications Tested

Peptide ELISA: antibody detection limit dilution 1:64000.

Western blot: Preliminary experiments gave an approx 26kDa band in lysates of cell line KELLY after 0.3µg/ml antibody staining. Please note that currently we cannot find an explanation in the literature for the band we observe given the calculated size of 39.0kDa according to NP_005977.2. The 26kDa band was successfully blocked by incubation with the immunizing peptide. We would appreciate any feedback from people in the field - have any results been reported with other antibodies/lysates? Have any further splice variants/modified forms been reported?

Species Reactivity

Tested:

Expected from sequence similarity: Human, Mouse
