# EB09977 - Goat Anti-SOX21 Antibody

Size: 100µg specific antibody in 200µl

### **Target Protein**

Principal Names: SOX25, SRY (sex determining region Y)-box 21, SRY-box 21, SOX21 Official Symbol: SOX21 Accession Number(s): NP\_009015.1 Human GeneID(s): <u>11166</u> Non-Human GeneID(s): 223227 (mouse), 306168 (rat)

#### Immunogen

Peptide with sequence C-GVADAEHPALKAG, from the internal region of the protein sequence according to NP\_009015.1.

Please note the peptide is available for sale.

## **Purification and Storage**

Purified from goat serum by ammonium sulphate precipitation followed by antigen affinity chromatography using the immunizing peptide.

Supplied at 0.5 mg/ml in Tris saline, 0.02% sodium azide, pH7.3 with 0.5% bovine serum albumin.

Aliquot and store at -20°C. Minimize freezing and thawing.

## **Applications Tested**

Peptide ELISA: antibody detection limit dilution 1:16000.

**Western blot:** Preliminary experiments gave an approx 38kDa band in Mouse Fetal Brain lysates after 1µg/ml antibody staining. Please note that currently we cannot find an explanation in the literature for the band we observe given the calculated size of 28.6kDa according to NP\_009015.1. The 38kDa band was successfully blocked by incubation with the immunizing peptide. We would appreciate any feedback from people in the field - have any results been reported with other antibodies/lysates? Have any further splice variants/modified forms been reported?

## **Species Reactivity**

Tested: Expected from sequence similarity: Human, Mouse, Rat
