# EB06260 - Goat Anti-SPA1 / SIPA1 Antibody

Size: 100µg specific antibody in 200µl

#### **Target Protein**

Principal Names: SIPA1, SPA1, MGC17037, signal-induced proliferation-associated gene 1, p130 SPA-1, GTPase-activating protein Spa-1, signal-induced proliferation-associated 1, MGC102688, signal-induced proliferation-associated gene 1, signal-induced proliferation-associated protein 1 Official Symbol: SIPA1 Accession Number(s): NP\_694985.28; NP\_006738.3 Human GeneID(s): <u>6494</u> Important Comments: Both variants represent identical protein (NP\_694985.28 and

NP\_006738.3).

#### Immunogen

Peptide with sequence C-ASKQLGSPTADLA, from the C Terminus of the protein sequence according to NP\_694985.28; NP\_006738.3.

Please note the peptide is available for sale.

### **Purification and Storage**

Purified from goat serum by ammonium sulphate precipitation followed by antigen affinity chromatography using the immunizing peptide.

Supplied at 0.5 mg/ml in Tris saline, 0.02% sodium azide, pH7.3 with 0.5% bovine serum albumin.

Aliquot and store at -20°C. Minimize freezing and thawing.

### **Applications Tested**

**Peptide ELISA:** antibody detection limit dilution 1:32000.

**Western blot:** Approx. 150kDa band observed in Human lysates of EBV-immortilized lymphoblastoid (calculated MW of 112kDa according to NP\_694985.28 and NP\_006738.2). The observed molecular weight corresponds to earlier findings in literature with different antibodies (Kurachi et al, J Biol Chem. 1997 Oct 31;272(44):28081-8; PMID: 9346962). Recommended concentration:  $1-3\mu$ g/ml. An additional band of 55-60kDa was consistently observed, however this band was not blocked by the immunizing peptide and it is therefore a non-specific signal. We call for caution when this product is used for other assays than Western blot.

#### **Species Reactivity**

Tested: Human Expected from sequence similarity: Human

EB06260 staining (1µg/ml) of Human EBV-immortilized lymphoblastoid lysate (RIPA buffer, 35µg total protein per lane). Primary incubated for 1 hour. Detected by western blot using chemiluminescence.
