EB07084 - Goat Anti-TRIM5 / RNF88 (alpha isoform) Antibody

Size: 100µg specific antibody in 200µl

Target Protein

Principal Names: TRIM5, tripartite motif-containing 5, HGNC:16276, RNF88, tripartite motif protein 5, tripartite motif protein TRIM5, TRIM5alpha, OTTHUMP00000069812, tripartite motif protein TRIM, tripartite motif-containing protein 5 alpha

Official Symbol: TRIM5

Accession Number(s): NP_149023.1

Human GeneID(s): [85363](#)

Important Comments: This antibody is expected to recognise isoform alpha (NP_149023.1) only.

Immunogen

Peptide with sequence CNIKKNENYQPK, from the internal region of the protein sequence according to NP_149023.1.

Please note the [peptide](#) is available for sale.

Purification and Storage

Purified from goat serum by ammonium sulphate precipitation followed by antigen affinity chromatography using the immunizing peptide.

Supplied at 0.5 mg/ml in Tris saline, 0.02% sodium azide, pH7.3 with 0.5% bovine serum albumin.

Aliquot and store at -20°C. Minimize freezing and thawing.

Applications Tested

Peptide ELISA: antibody detection limit dilution 1:32000.

Western blot: Preliminary experiments gave an approx 37kDa band in Lysates of Human cell lines Daudi, Jurkat and MOLT4 after 0.3 µg/ml antibody staining. Please note that currently we cannot find an explanation in the literature for the band we observe given the calculated size of 56.3kDa according to NP_149023.1. The 37kDa band was successfully blocked by incubation with the immunizing peptide. We would appreciate any feedback from people in the field - have any results been reported with other antibodies/lysates? Have any further splice variants/modified forms been reported?

IHC: In paraffin embedded Human Kidney shows cytoplasm staining in PCT.

Recommended concentration, 3-6µg/ml.

Species Reactivity

Tested:

Expected from sequence similarity: Human

EB07084 (4 μ g/ml) staining of paraffin embedded Human Kidney. Steamed antigen retrieval with citrate buffer pH 6, HRP-staining.
