# EB11372 - Goat Anti-TRIM6 (aa118-131) Antibody

Size: 100µg specific antibody in 200µl

## **Target Protein**

Principal Names: OTTHUMP00000069818, OTTHUMP00000069819, OTTHUMP0000069820, OTTHUMP00000197092, OTTHUMP00000220648, OTTHUMP00000220649, OTTHUMP00000220650, RING finger protein 89, RNF89, tripartite motif containing 6, tripartite motif-containing protein 6, TRIM6

Official Symbol: TRIM6

Accession Number(s): NP\_001003818.1; NP\_477514.1

Human GenelD(s): 117854, 445372

**Important Comments:** This antibody is expected to recognize reported isoforms 1 and 2 (NP\_001003818.1; NP\_477514.1). Reported variants represent identical protein:

NP\_001185573.1, NP\_001185574.1

## **Immunogen**

Peptide with sequence KQLKAVLCADHGEK, from the internal region of the protein sequence according to NP\_001003818.1; NP\_477514.1.

Please note the peptide is available for sale.

## **Purification and Storage**

Purified from goat serum by ammonium sulphate precipitation followed by antigen affinity chromatography using the immunizing peptide.

Supplied at 0.5 mg/ml in Tris saline, 0.02% sodium azide, pH7.3 with 0.5% bovine serum albumin.

Aliquot and store at -20°C. Minimize freezing and thawing.

## **Applications Tested**

Peptide ELISA: antibody detection limit dilution 1:8000.

**Western blot:** Preliminary experiments gave an approx 70-75kDa band in Human Kidney and Liver lysates after 0.2μg/ml antibody staining. Please note that currently we cannot find an explanation in the literature for the band we observe given the calculated size of 59.4kDa according to NP\_001003818.1. The 70-75kDa band was successfully blocked by incubation with the immunizing peptide. We would appreciate any feedback from people in the field - have any results been reported with other antibodies/lysates? Have any further splice variants/modified forms been reported?

#### **Species Reactivity**

Tested:

Expected from sequence similarity: Human
