# EB05649 - Goat Anti-TUSC4 / NPR2L (C Terminus) Antibody

Size: 100µg specific antibody in 200µl

# **Target Protein**

Principal Names: TUSC4, NPR2L, NPRL2, homologous to yeast nitrogen permease

(candidate tumor suppressor)

Official Symbol: TUSC4

Accession Number(s): NP\_006536

Human GeneID(s): 10641

Non-Human GenelD(s): 56032 (mouse)

## **Immunogen**

Peptide with sequence ERLENDPNIIICWK, from the C Terminus of the protein sequence according to NP\_006536.

# **Purification and Storage**

Purified from goat serum by ammonium sulphate precipitation followed by antigen affinity chromatography using the immunizing peptide.

Supplied at 0.5 mg/ml in Tris saline, 0.02% sodium azide, pH7.3 with 0.5% bovine serum albumin.

Aliquot and store at -20°C. Minimize freezing and thawing.

## **Applications Tested**

Peptide ELISA: antibody detection limit dilution 1:32000.

**Western blot:** Western Blot: Preliminary experiments gave a 80-90kDa band in HepG2 and H460 lysates at 2ug of primary. Please note that currently we cannot find an explanation in the literature for the band we observe given the predicted size of approx. 42Kda according to NP\_006536. We would appreciate any feedback from people in the field - have any results been reported with other antibodies/lysates? Have any further splice variants/modified forms been reported?

## **Species Reactivity**

Tested:

Expected from sequence similarity: Human, Mouse
