EB06992 - Goat Anti-Ubiquilin 1 Antibody

Size: 100µg specific antibody in 200µl

Target Protein

Principal Names: UBQLN1, ubiquilin 1, HGNC:12508, DA41, DSK2, PLIC-1, XDRP1, FLJ90054 Official Symbol: UBQLN1 Accession Number(s): NP_038466.2; NP_444295.1 Human GenelD(s): 29979 Non-Human GenelD(s): 56085 (mouse) Important Comments: This antibody is expected to recognise both reported isoforms (NP_038466.2 and NP_444295.1)

Immunogen

Peptide with sequence C-KTQNRPQDHSAQQTN, from the internal region of the protein sequence according to NP_038466.2; NP_444295.1.

Please note the <u>peptide</u> is available for sale.

Purification and Storage

Purified from goat serum by ammonium sulphate precipitation followed by antigen affinity chromatography using the immunizing peptide.

Supplied at 0.5 mg/ml in Tris saline, 0.02% sodium azide, pH7.3 with 0.5% bovine serum albumin.

Aliquot and store at -20°C. Minimize freezing and thawing.

Applications Tested

Peptide ELISA: antibody detection limit dilution 1:64000.

Western blot: Western Blot: Preliminary experiments gave no signals in Human Brain lysates, but showed an approx 80kDa band in Human Placenta lysates after 0.3µg/ml antibody staining. Please note that currently we cannot find an explanation in the literature for the band we observe given the calculated size of 62.5kDa according to NP_038466.2. The 80kDa band was successfully blocked by incubation with the immunizing peptide. We would appreciate any feedback from people in the field - have any results been reported with other antibodies/lysates? Have any further splice variants/modified forms been reported?

Species Reactivity

Tested:

Expected from sequence similarity: Human, Mouse, Dog
