EB09713 - Goat Anti-VPREB3 Antibody

Size: 100µg specific antibody in 200µl

Target Protein

Principal Names: VPREB3, pre-B lymphocyte 3, 8HS20, N27C7-2, pre-B lymphocyte gene 3

Official Symbol: VPREB3

Accession Number(s): NP_037510.1

Human GeneID(s): [29802](#)

Non-Human GeneID(s): 22364 (mouse), 365550 (rat)

Immunogen

Peptide with sequence EAHNACVLTISPVQ, from the internal region of the protein sequence according to NP_037510.1.

Please note the [peptide](#) is available for sale.

Purification and Storage

Purified from goat serum by ammonium sulphate precipitation followed by antigen affinity chromatography using the immunizing peptide.

Supplied at 0.5 mg/ml in Tris saline, 0.02% sodium azide, pH7.3 with 0.5% bovine serum albumin.

Aliquot and store at -20°C. Minimize freezing and thawing.

Applications Tested

Peptide ELISA: antibody detection limit dilution 1:16000.

Western blot: Preliminary experiments gave an approx 26kDa band in Human Lymph Node lysates after 1µg/ml antibody staining. Please note that currently we cannot find an explanation in the literature for the band we observe given the calculated size of 13.7kDa according to NP_037510.1. The 26kDa band was successfully blocked by incubation with the immunizing peptide. We would appreciate any feedback from people in the field - have any results been reported with other antibodies/lysates? Have any further splice variants/modified forms been reported?

Species Reactivity

Tested:

Expected from sequence similarity: Human, Mouse, Rat, Pig
