## EB06829 - Goat Anti-VPS18 Antibody

Size: 100µg specific antibody in 200µl

### Target Protein

**Principal Names:** VPS18, vacuolar protein sorting protein 18, HGNC:15972, KIAA1475, vacuolar protein sorting 18, vacuolar protein sorting 18 homolog (S. cerevisiae), PEP3

**Official Symbol:** VPS18

**Accession Number(s):** NP\_065908.1

**Human GeneID(s):** [57617](#)

### Immunogen

Peptide with sequence CADLPEEDEELRKK, from the internal region of the protein sequence according to NP\_065908.1.

Please note the [peptide](#) is available for sale.

### Purification and Storage

Purified from goat serum by ammonium sulphate precipitation followed by antigen affinity chromatography using the immunizing peptide.

Supplied at 0.5 mg/ml in Tris saline, 0.02% sodium azide, pH7.3 with 0.5% bovine serum albumin.

Aliquot and store at -20°C. Minimize freezing and thawing.

### Applications Tested

**Peptide ELISA:** antibody detection limit dilution 1:16000.

**Western blot:** Preliminary experiments gave an approx 25-26kDa band in lysates of Human Duodenum, Colon and Placenta after 1µg/ml antibody staining. Please note that currently we cannot find an explanation in the literature for the band we observe given the calculated size of 110kDa according to NP\_065908.1. The 25-26kDa band was successfully blocked by incubation with the immunizing peptide. We would appreciate any feedback from people in the field - have any results been reported with other antibodies/lysates? Have any further splice variants/modified forms been reported?

### Species Reactivity

**Tested:**

**Expected from sequence similarity:** Human, Mouse, Rat, Dog, Pig, Cow
