EB06259 - Goat Anti-VPS33B (C Term) Antibody

Size: 100µg specific antibody in 200µl

Target Protein

Principal Names: VPS33B, FLJ14848, vacuolar protein sorting 33B (yeast), FLJ14848, vacuolar protein sorting 33B (yeast homolog)

Official Symbol: VPS33B

Accession Number(s): NP_061138.2

Human GeneID(s): [26276](#)

Immunogen

Peptide with sequence C-SARLMEAMSEVKA, from the C Terminus of the protein sequence according to NP_061138.2.

Purification and Storage

Purified from goat serum by ammonium sulphate precipitation followed by antigen affinity chromatography using the immunizing peptide.

Supplied at 0.5 mg/ml in Tris saline, 0.02% sodium azide, pH7.3 with 0.5% bovine serum albumin.

Aliquot and store at -20°C. Minimize freezing and thawing.

Applications Tested

Peptide ELISA: antibody detection limit dilution 1:32000.

Western blot: Western Blot: Preliminary experiments gave an approx 35kDa band in Human Testis lysates and bands at both approx 35kDa and approx 50kDa in Human Heart (both results at 1µg/ml). Please note that currently we cannot find an explanation in the literature for the bands we observe given the predicted size of approx. 71kDda according to NP_061138.2. We would appreciate any feedback from people in the field - have any results been reported with other antibodies/lysates? Have any further splice variants/modified forms been reported?

Immunohistochemistry: Preliminary experiments in Human Kidney showed cytoplasmic staining of epithelial cells of renal tubules and rare cells of glomeruli. Recommended concentration 5- 10µg/ml

Species Reactivity

Tested:

Expected from sequence similarity: Human, Mouse, Rat
