## EB10421 - Goat Anti-ZDHHC1 (aa174-182) Antibody

Size: 100µg specific antibody in 200µl

### Target Protein

**Principal Names:** C16orf1, DHHC-domain-containing cysteine-rich protein, HSU90653, zinc finger, DHHC domain containing 1, zinc finger, DHHC-type containing 1, ZNF377, ZDHHC1

**Official Symbol:** ZDHHC1

**Accession Number(s):** NP\_037436.1

**Human GeneID(s):** [29800](#)

**Non-Human GeneID(s):** 70796 (mouse), 291967 (rat)

### Immunogen

Peptide with sequence C-RNYRLFLHS, from the internal region of the protein sequence according to NP\_037436.1.

Please note the [peptide](#) is available for sale.

### Purification and Storage

Purified from goat serum by ammonium sulphate precipitation followed by antigen affinity chromatography using the immunizing peptide.

Supplied at 0.5 mg/ml in Tris saline, 0.02% sodium azide, pH7.3 with 0.5% bovine serum albumin.

Aliquot and store at -20°C. Minimize freezing and thawing.

### Applications Tested

**Peptide ELISA:** antibody detection limit dilution 1:2000.

**Western blot:** Preliminary experiments gave bands at approx 48kDa and 20kDa in lysates of cell line HEK293 after 2µg/ml antibody staining. Please note that currently we cannot find an explanation in the literature for the bands we observe given the calculated size of 54.8kDa according to NP\_037436.1. Both detected bands were successfully blocked by incubation with the immunizing peptide (and BLAST results with the immunizing peptide sequence did not identify any other proteins to explain the additional bands).

### Species Reactivity

**Tested:**

**Expected from sequence similarity:** Human, Mouse, Rat
