## EB09120 - Goat Anti-ZNF228 / ZFP112 Antibody

Size: 100µg specific antibody in 200µl

### Target Protein

**Principal Names:** ZFP112, zinc finger protein 112 homolog (mouse), ZNF228, zinc finger protein 228

**Official Symbol:** ZFP112

**Accession Number(s):** NP\_001076804.1; NP\_037512.3

**Human GeneID(s):** [7771](#)

**Important Comments:** This antibody is expected to recognize both reported isoforms (NP\_001076804.1; NP\_037512.3)

### Immunogen

Peptide with sequence C-EREDDIENSHLKSQ, from the internal region of the protein sequence according to NP\_001076804.1; NP\_037512.3.

Please note the [peptide](#) is available for sale.

### Purification and Storage

Purified from goat serum by ammonium sulphate precipitation followed by antigen affinity chromatography using the immunizing peptide.

Supplied at 0.5 mg/ml in Tris saline, 0.02% sodium azide, pH7.3 with 0.5% bovine serum albumin.

Aliquot and store at -20°C. Minimize freezing and thawing.

### Applications Tested

**Peptide ELISA:** antibody detection limit dilution 1:4000.

**Western blot:** Preliminary experiments gave an approx. 48kDa band in lysates of cell line HepG2 after 2µg/ml antibody staining. Please note that currently we cannot find an explanation in the literature for the band we observe given the calculated size of 105kDa according to NP\_037512.3. The 48kDa band was successfully blocked by incubation with the immunizing peptide. We would appreciate any feedback from people in the field - have any results been reported with other antibodies/lysates? Have any further splice variants/modified forms been reported?

### Species Reactivity

**Tested:**

**Expected from sequence similarity:** Human
